**KEY FEATURES**

- Heavy duty sealed unit - highly water and dust resistant
- Rugged construction - shock proof
- Stable calibration - linear accuracy - no zero adjustment
- Self verification of the measurements to ensure accuracy
- Various probe options
- Displays sound velocity settings
- Echo strength indicator to aid measurement
- Bright LED display with polarised filter
- Gauge senses probe type and automatically adjusts settings for optimum performance
- Low battery warning
- Metric / imperial switchable

**BENEFITS OF MULTIPLE-ECHO**

- Measures remaining metal thickness on corroded and coated structures
- All measurements are error checked using 3 return echoes to give repeatable, reliable results
- Accepted by all major classification societies
- Greatly reduces inspection time and costs
- Echo strength indicator to aid measurement.

With Multiple-Echo, readings are taken by measuring the time delay between any three consecutive backwall echoes. The time of T1 (coating thickness) is ignored. The times of T2 and T3 are equal to the time that it takes to travel through the metal. Only by looking at three echoes can the measurements be automatically verified (where T2 = T3).

**APPLICATIONS**

Maintenance and safety checks of metal thickness for:

- Metal thickness monitoring on cranes, marine structures and conveying systems
- Corrosion checks on ships’ shell plates, bulkheads and structure
- Metal thickness safety checks on steam and pressurised water systems, transportable gas containers and compressed air systems
- Systematic wall thickness and corrosion monitoring of storage tanks and process vessels
- Quality assurance metal thickness checks
- Maintenance and safety checks on bridges and street lighting columns
- Pipeline wall thickness monitoring.
**KIT CONTENTS**
Cygnus Heavy Duty ultrasonic thickness gauge; heavy duty remote 2.25 MHz x 13 mm (0.5 inch) diameter probe; battery pack; spare membranes and O-rings; steel test block; calibration trim tool; operational manual and carry case.

**SPECIFICATION**

<table>
